About Roca

Roca is a family-owned company dedicated to the design and production of solutions for the bathroom space. From our beginnings in Barcelona in 1917, we have grown into a global benchmark in sanitaryware. Roca is now one of the largest producers of bathroom products on the planet, operating 79 production facilities across five continents, employing over 20,000 people and serving over 170 markets.

170 Markets

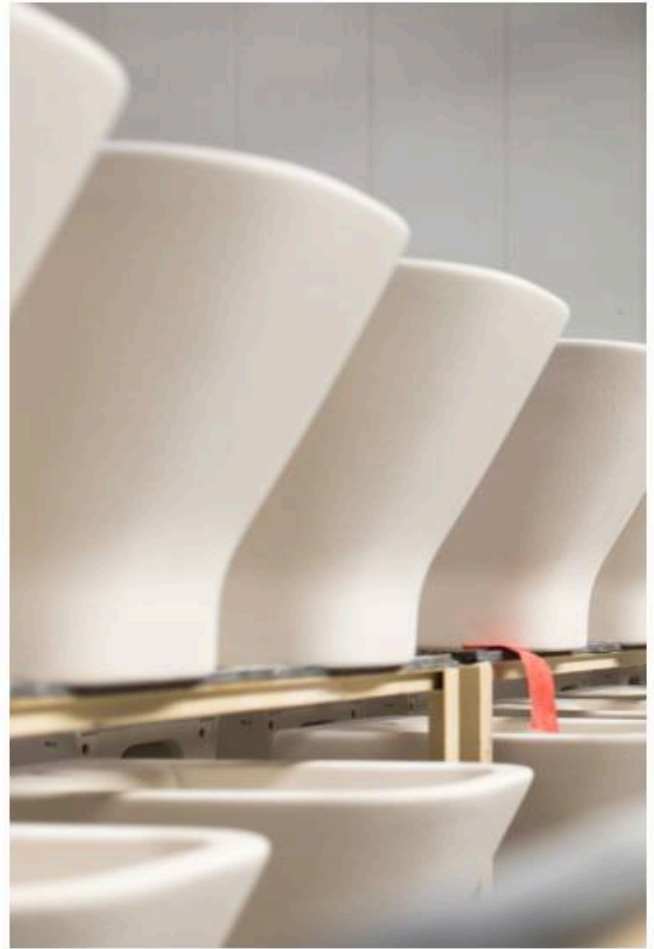

Our designs are intuitive and intentional. Our philosophy is one of perpetual improvement, and we constantly seek to improve our product experience. Drawing on the knowledge and expertise of our global network, as well as over 100 years of experience in the sector, we develop innovative solutions that refine your bathroom while bringing comfort and simplicity to your daily routine.

Design is ingrained in everything we do. Our team of experts, often through collaborations with some of the world's leading designers, consistently create products and collections that drive innovation in the sector. These teams, along with our cutting-edge facilities, manufacturing prowess and exceptional

production capacity, have allowed us to maintain our position of global leadership for more than a century. Even while achieving a presence in over 170 markets across the world, we have remained close to our roots. From the beginning, we have been active participants in Barcelona's design culture, where forward-thinking ideas and vernacular styles go hand-in-hand to create natural, intuitive solutions that enhance daily living. We will continue both to draw from and contribute to this community.

We recognise that our position of global leadership comes with responsibility. We seek to set the standard in sustainability at every step of the manufacturing process: from the acquisition

of materials, through to production, logistics, packing and shipping. We design our products with sustainability and efficiency in mind, from toilets that minimise water consumption to furniture made with wood sourced from responsibly-managed forests.

We also carry out projects that help address some of the most pressing global challenges of our time. To this end, our foundation We Are Water works to promote a culture of sustainable, responsible water management, and to provide safe, reliable access to clean water in some of the most disadvantaged communities across the globe.

Our commitment to the planet extends into the social field. We are serious about our responsibility towards our employees and the communities we serve. Our aim of improving people's lives both

within and outside the company has led us to promote initiatives that foster talent and improve the customer experience. We organise design competitions, such as the *jumpthegap*® and the One Day Design Challenge, which provide opportunities for emerging designers to showcase their creativity and expand their professional networks. And through our six international Roca Galleries, and web platform rocagallery.com, we host events, talks and articles which foster dialogue around some of the planet's most important issues.

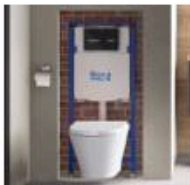

We celebrate the small, daily moments of domestic happiness. The bathroom is an intimate space of self-care which can enhance users' daily lives. At the heart of our business is the desire to develop attractive and functional solutions that contribute to improved wellbeing and better standards of living.

We make
people live the
best bathroom
experience

Smart Toilets

Roca's smart toilets offer a range of options to suit different preferences and budgets combining cutting-edge technology, hygiene and comfort to provide users with a modern and connected bathroom experience. Personalised programme settings and easy maintenance and cleaning management can be tailored to individual needs through the Roca Connect App.

Cutting-edge technology to offer maximum hygiene and comfort in the bathroom

Flushing

Exceeding water pressure limitations: Thanks to the innovative siphonic trap design, Tankless performance remains unmatched, achieving superior cleaning in low pressure condition's, enabling more sustainable water usage.

Roca Rimless® Vortex: A bowl specially designed to optimise water flow, flush performance and hygiene.

Auto Open/Close: The automatic opening and closing of the seat and lid provides a more hygienic and comfortable experience, eliminating the need to touch the seat or lid.

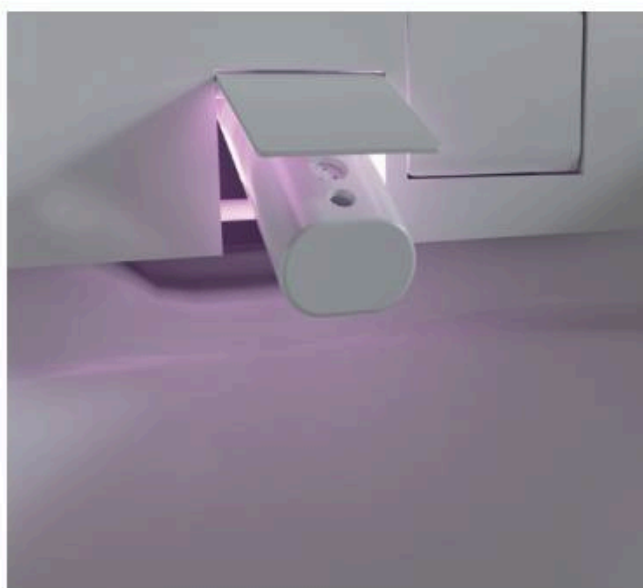

Auto Flush: This feature automatically determines the appropriate flush volume, providing either a full or half flush, depending on user needs. For added hygiene and convenience, this functionality also allows the configuration of a pre-flush that activates as the user approaches, helping to maintain a clean bowl.

Hygiene Flush: Roca's signature Hygiene Flush provides comprehensive cleaning and a subtle infusion of freshness through a dose of aromas released with each flush.

In-Tank®: A notable innovation is Roca's In-Tank® technology. This ingenious design, which integrates the cistern into the toilet bowl, significantly enhances the user experience by combining practicality with advanced technology for maximum convenience.

Smart Toilets

Cleaning

Rear wash with Multi-Stream: The rear wash with Multi-Stream gives users a choice of three different rear wash modes – soft, intense or mixed – delivered through a separate outlet from the front wash, allowing for tailored cleaning to suit different preferences.

Microbubble: With dense bubbles ranging from 0.01 to 100 microns, it gently cleans every corner thoroughly.

Maximum customisation: Adjustable nozzle positions, water pressure, temperature and oscillation ensure ideal water distribution for a better washing experience. These functions can be personalised and conveniently controlled. In addition, the mobile app allows for the creation of user profiles, automatic drying after washing, and the selection of washing and drying times.

Hygiene

Dual UV light: Dual UV light for inner water and nozzle, Effectively disinfect more than 99% bacteria, Avoid the breeding of bacteria and ensure hygiene.

Self-cleaning nozzle with UV: The application of water after each use, supplemented by UV light, effectively removes 99.99% of bacteria. While water cleaning alone is sufficient, integrated UV light treatment ensures optimum nozzle disinfection.

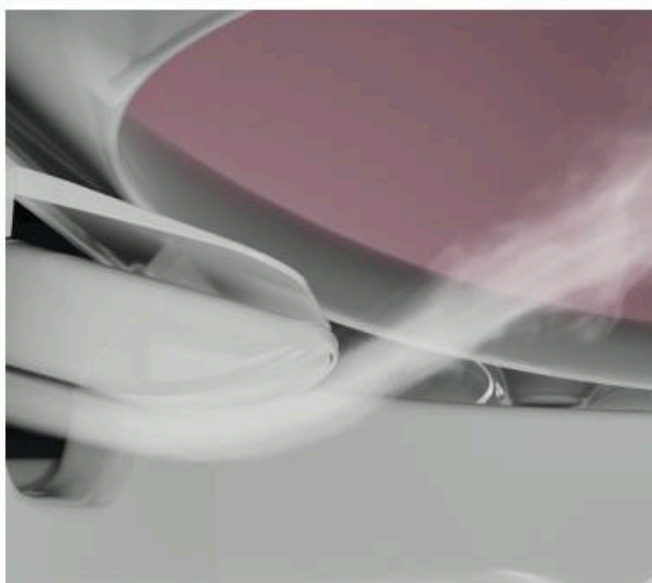

Antibacterial seat & nozzle: Antibacterial seat and cover. Special material with silver nano can kill most of the bacteria.

Auto Deodoriser: Designed to effectively remove odours and maintain a fresh bathroom environment.

Supraglaze®: An exclusive smooth Roca glazing for the bowl allows easy removal of any dirt particles and bacteria for greater hygiene.

Lift&Clean: Combined with Roca Rimless® technology, Lift&Clean makes it easy to remove all dirt particles, improving toilet hygiene and streamlining the cleaning process. The e-bidet can be partially detached, allowing the user to reach anywhere easily for cleaning.

Smart Toilets

Comfort

Coanda Effect Dryer: High-performance dryer with the Coanda effect, in which fluids tend to follow the surfaces. This principle was a source of inspiration in the design of the nozzle, which directs air to the precise point where it is needed. With the Coanda effect air is directed to a specific area for peak drying performance at any power level.

Heated Seat: A heat seat adds to the luxury experience by distributing heat evenly for extra comfort. Users can choose from four different temperature levels, either continuously or scheduled via the app.

Foot sensor: State-of-the-art sensor on the lower part of the toilet, which enables flushing by touching it with the foot. Ultimate convenience to activate the flushing system.

Descaling: Designed for easy maintenance and extended performance, the descaling solution is easy to use and requires minimal effort. Conveniently accessible via Roca Connect within the alerts and application support framework.

Comfort seat: It redefines the toilet experience with a bigger inner seat to reach new levels of comfort.

Night light: Configurable night light with longlife LEDs on both sides.

Bathroom Collections

The design and innovation of bathroom collections that transform the everyday bathroom experience is woven into the 100-year history of Roca. A combination of traditional stoneware and high-tech innovation in ceramics generate durable and anti-bacterial surfaces with new aesthetic possibilities for different shapes and designs. Technologies such as Roca Rimless® underscore the company's ongoing passion to create the best bathrooms for everyone. An extensive range of styles can be found in washbasins, toilets and bidets. Each piece is set apart by their diverse aesthetic and remarkable longevity, a key characteristic of sustainability.

Key Benefits

Hygiene. Zero porosity surface that prevents the absorption of water and the proliferation of humidity and bacteria.

Quality. Made with an exclusive mineral composition, our consistent and robust pieces undergo rigorous testing and controls.

Durability. The high-quality glaze provides stability against abrasive products, extreme temperatures or ultraviolet light.

Resistance. Solid and robust, with outstanding static resistance verified by load tests of up to 400 kg.

Technologies

Roca Rimless®

Easy cleaning. An interior bowl with no hidden nooks and crannies for dirt and germs to accumulate makes cleaning easier than ever.

Effective flush. Maximum power propels the water with more force and distributes it evenly over the entire surface ensuring a more effective hygiene, surpassing EU standards.

Roca Rimless® Vortex

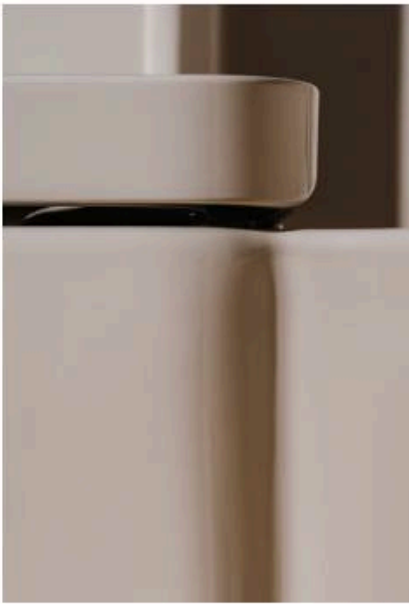

In addition, Roca Rimless® Vortex features an improved water flow with three extra benefits:

Maximum hygiene. An effective 360° whirlwind flush system with an enhanced water path to ensure complete coverage of every part of the bowl up to four times.

Extra silent. A smoother and more efficient water outlet reduces turbulence and noise.

No splashback. The optimised circular motion of water puts an end to splashing and considerably reduces the effect of aerosols.

Each piece is set
apart by their diverse
aesthetic and
remarkable longevity,
a key characteristic of
sustainability

A combination of
traditional stoneware
and high-tech
innovations in ceramics
enable new aesthetic
possibilities

Materials

Supralit®

Hygienic. Zero porosity surface that prevents the absorption of liquids and the proliferation of humidity and bacteria.

Easy cleaning. Seats free of corners where dirt can accumulate, making maintenance easier.

Resistance. Exclusive formulation highly resistant to chemicals and ultraviolet light.

Sustainable. Supralit® seats contribute to reducing the environmental impact thanks to the 47% recycled material of plant origin used in their composition.

Fineceramic®

Lightness. Thinner walls that allow basins to be shaped with 40% less thickness.

Firmness. Innovative formulation creating parts that are 30% more resistant than conventional ceramic products.

Hygiene. 100% ceramic material with zero porosity vitrified enamel.

Durability. High resistance to abrasive products and ultraviolet light.

Supraglaze®

Antimicrobial. Super smooth surface of this antimicrobial glazing prevents the spread of viruses and growth of bacteria.

Extremely smooth Surface. Waterproof, shiny, smooth surfaces. Sustainable, less water and cleaning products.

Efficient cleaning. Allows any dirt particles to slide off and inhibits the buildup of dirt.

Installation Systems

Roca's installation systems are meticulously designed to seamlessly fit into any bathroom. These space-saving systems offer adaptable features and a range of solutions, including silent flush and adjustable options to ensure effortless installation. Water-saving is core to the design of all of Roca's installation systems.

Water and energy-saving features are core to the design of all of Roca's installation systems

Key Benefits

Compact solutions. Models that allow wall installation in spaces with a low fastening depth.

Resistance. Guaranteed static resistance of up to 400 kg.

Durability. High performance flush valve with 200,000 actuation cycles guaranteed.

Noise reduction. Features noise-reducing components.

Easy maintenance. Easy plate assembly and maintenance with convenient access to the inside of the cistern.

Versatility. For any type of installation, including fixation holes for wood and metal profiles. Smart toilet solutions available.

Adjustable. Easy height adjustment with a 0-200 mm brake system. Position and angle of outlet pipe can also be adjusted.

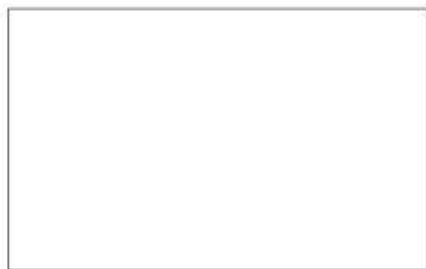

Water saving. Flushing volume is easily adjusted, various dual flush configurations and flow restrictors available.

Finishes

Colours. Wide range of finishes matching other products with the same finishes.

Glass. Operating plates with sophisticated glass finishes.

Transform the look
and feel of your
bathroom space

With over 100 years of knowledge and expertise, Roca is Europe's leader in the production and manufacturing of bathroom furniture. Using new technologies and innovative designs, including proprietary finishes, quality materials, and enhanced hardware solutions, Roca's extensive catalogue of bathroom furniture transforms the look and feel of any bathroom space. Furniture units, auxiliary columns and accessories all meet the highest standards in versatility, accessibility and style, with an ongoing commitment to sustainability and social responsibility.

Key Benefits

Quality. Exquisite finishes, innovative materials and fine elements such as solid wood, marble or quartz.

Styles. Extensive catalogue of designs for every interior design project.

Resistance. High quality guides and hinges that guarantee 20,000 opening and closing cycles.

Adaptability. Diverse selection of sizes and typologies for all kinds of spaces and needs.

Broad range. Broad range of options including Unik solutions that encompass a base unit and basin, and Pack solutions featuring Unik and matching mirror.

Complementary products. Large variety of base units, basins, auxiliary units (such as column or top units), mirrors, and spotlights.

Comfort. Soft close system for drawers and doors to avoid bangs and noises.

Functionality. Fully extractable drawers allow easy access to the interior space. Drawers glide smoothly and securely.

Adjustable. High-quality door hinges enable easy adjustments in terms of height, depth, or sideways positioning. Reversible auxiliary units allow for left or right installation.

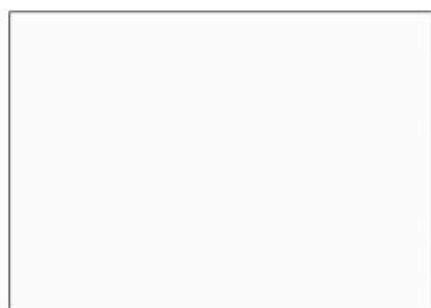

Capacity. Large drawers without a cut-out for the syphon provide generous storage volume.

Order. Drawers with built-in dividers, hidden compartments and organising boxes that enable a more optimal distribution of the contents.

Accessories Collections

There are many specific items with important functions in the everyday bathroom experience

Key Benefits

Styles. Innovative design in different styles and finishes.

Versatility. Wide range of products with deck-mounted and wall-mounted models.

Dual installation. Installation kit with screws or adhesive included.

Quality. High-quality and long-lasting materials.

Stability. Stable against abrasive products, extreme temperatures, and UV light.

Resistance. Wall-hung items withstand loads of up to 5 kg.

Quick fix system. Swift and easy installation.

Sustainable. Designed with recyclable materials, packaged, and produced with minimum environmental impact.

Evershine. Long-lasting and polished chrome plating.

Easy to clean. No specific products are required for maintenance.

Finishes

PVD Finishes. With a physical particle vaporization process that ensures an elegant, even, and scratch-resistant finish.

Painted finishes. With highly resistant polyester resins and pigments that maintain colour permanently.

Accessories are key components for a complete bathroom space. From wall-hung robe hooks to freestanding toilet roll holders or on countertop soap dishes, there are many specific items with important functions in the everyday bathroom experience. Different collections offer a variety of designs including metallic or colour finishes and embrace new materials such as wood, felt and cork, bringing a warm and tactile element to the bathroom space.

Sustainability
and safety are
integrated into
every faucet

A perfect union of precision technology and innovative design defines Roca's bathroom and kitchen faucets. Never before have there been so many possibilities – from colour, shape, finish and size – designed to appeal to a range of tastes and styles. Sustainability and safety are integrated into every faucet; non-toxic, highly resistant finishes such as Everlux PVD allow for a long life span, while energy saving systems such as Cold Start and advanced basin aerators limit and monitor water flow, giving each user peace of mind.

Key Benefits

Durability. Exclusive ceramic cartridge, which allows a soft and precise operation, with the guarantee of one million opening and closing movements.

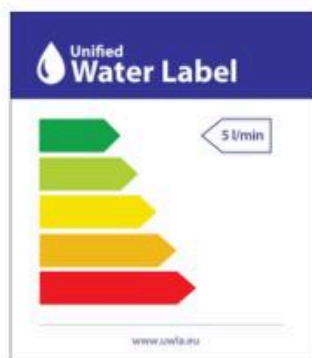

Water conservation. The latest generation of flow limiters offers a flow rate of 5 L/min, regardless of the pressure system, with water savings of 60%*.

Homogeneous flow. Aerators with excellent aerated jet quality, even under complex pressure conditions. They feature anti-limescale protection for easy cleaning and maintenance.

Adaptability. Three heights for basin faucets (S, M, and L in one piece) to provide greater user-friendliness.

Acoustic control. Sound reduction system integrated into the cartridges and faucets to limit the noise of the water.

Safety. Protective filters included in the aerators that stop any particles coming through from the mains.

Water Label

Many of our products are registered with the European Unified Water Label scheme, widely used across Europe to classify and promote water-efficient products. For WCs, the Unified Water Label assesses water efficiency based on the average flush volume. For dual flush systems, the average is calculated from one full flush and three reduced flushes. The rating system ranges from an average flush volume of 3.50 litres or less (Band 1), to a flush volume of more than 6 litres (Band 5).

Technologies

Cold Start

Energy savings. Basin models feature Cold Start, cold water opening that guarantees energy savings of 45%*.

Finishes

Evershine

A high-quality chrome outer layer guarantees a permanent shine and makes cleaning easier.

Matt finishes

Polyester thermosetting powder coating based on polyester resins, resistant to external agents, UV radiation and corrosion.

Nu Collection finishes

Glossy finished coatings based on polyester resins, highly resistant to external agents and UV radiation and high thermal resistance that prevent corrosion.

Everlux

Sophisticated. Exclusive and trendy coating that adds distinction and uniqueness to the bathroom.

Sustainable. Purely physical technique that does not require harmful chemicals or generate water pollution during its production process.

Resistant. Additional layer over the chrome plating consisting of noble and very hard metals that ensure the surface is extraordinarily resistant to scratches and cleaning products.

*Based on annual savings for a family of 4, considering 2 minutes per day of toothbrushing and handwashing 5 times a day.

Bath-Shower Mixers

A simple shower can be transformative without the need for a large space or complicated installations. Designed for any bathroom space and user needs, Roca's shower systems offer universal shower solutions. The ultimate soothing and cleansing experiences come in the form of handheld showers with multiple spray options or ceiling-mounted rain showers. Thermostatic mixers are designed for any type of wall and shower space, while smart shower solutions help reduce energy and water consumption and allow for programmable shower options. Elegant and modern designs, including chrome and matt black finishes on shower fixtures, add style and enhance the overall experience.

Universal
shower solutions
designed for any
bathroom space
and user needs

Thermostatic faucets

Quick Reaction® technology. Faucets achieve the desired temperature in just a few seconds while maintaining it consistently, saving both water and energy.

Precision. Ergonomic control that allows the user to select the temperature swiftly and precisely with a simple gesture.

Security 38°. A limiting system that prevents the temperature from exceeding 38° by default.

Safe Touch. It prevents the faucet body from overheating, avoiding burns when touching the metal parts.

Anti-scalding. If the cold-water supply is turned off, the flow of hot water will automatically cease.

Efficiency. The desired temperature is delivered almost instantly to avoid wasting water and energy.

Baths

The right bath can become the centrepiece of any bathroom space. A place to disconnect, soak and rejuvenate, baths need to be both ergonomic and elegant be they freestanding or inset. Roca offers a wide selection of baths available in classic, vintage or modern designs. These baths are crafted using a variety of materials, including cutting-edge components that enable thinner and more curvilinear shapes. Additionally, they incorporate advanced features to enhance hygiene and ensure increased safety.

Hydromassage Systems

Hydromassage Systems

Basic

Continuous water massage. Pneumatic push button.

The Basic system consists of an On/Off water hydromassage function controlled by a pneumatic push button. This system includes lateral adjustable jets that provide a continuous water massage.

Tonic

Invigorating water massage. Electronic push button.

The Tonic system features a water hydromassage that can be adjusted by means of a power-regulating push button. This system is equipped with lateral adjustable jets to ensure a continuous water massage.

Total

Invigorating water massage and relaxing air massage. Electronic digital panel.

The Total system features a water-air hydromassage managed by an LCD digital panel. It offers a range of massage programmes, including continuous or pulsating options, and an electronic Venturi function. This system incorporates lateral, back and feet jets, as well as air jets positioned at the base of the bath. All of these jets can be adjusted through the digital panel. The Total system is also equipped with temperature and level sensors to guarantee optimal bath performance.

Total Premium

New experiences, better sensations.

The best sensations with the most comprehensive hydromassage system by Roca. Choose, combine and customize your relax session with the water-resistant remote control with touch screen; massage on feet, back, soft air bubbles or new experiences through chromotherapy. The baths with Total Premium hydromassage include a selfcleaning system and the maintenance of the temperature to maximize your well-being.

Hydromassage Systems

Hydromassage Functions

Water massage

The water massage is delivered through jets that release a mixture of water and air, creating a toning effect on our bodies. The intensity of the jets can be adjusted using a manual or electronic Venturi function, depending on the system, allowing for customised water pressure, with a softer or more invigorating experience.

Lateral massage: Adjustable jets located on the side of the bath.

Foot massage: Specific for feet.

Back massage: Specific for the back.

Air massage

This massage is performed using bubbles that are released through small jets positioned at the base of the bath. An air massage is softer and more relaxing than a water massage, and the intensity of the bubbles can be adjusted using various control options.

Two different technologies are available:

Air jets and Soft jets

Chromotherapy

The Total Premium system includes the chromotherapy function, which works with 3 LED spotlights that change colour to create an immersive atmosphere. These lights are the ideal complement for a total hydromassage session.

Customization

Some systems allow users to personalise their massage session by creating programmes that align with their individual needs and preferences. This user-friendly feature enables quick and easy customization.

Self-cleaning

In small quantities, ozone generates a cleansing effect throughout the entire hydromassage system, guaranteeing a clean and hygienic experience every time it is used.

Control Panels

Pneumatic push button

Available in the Basic version. Pneumatic push button to activate and deactivate the hydromassage.

Electronic push button

Available in the Tonic version. Electronic push button to activate and deactivate the hydromassage. The Venturi function (intensity regulation) is activated by turning the push button. The illuminated Roca logo signals massage activation.

Digital panel

Available in the Total version. Digital panel with LCD screen. Menu navigation with three buttons that allow users to activate, deactivate, change, and adjust the various functions.

Remote control

Available in the Total Premium version. Water-resistant remote control with touch screen. Navigation based on each one of the icons that activate/deactivate each function. Icon-based navigation, with each icon corresponding to a specific function that can be activated or deactivated.

Types of Jets

Lateral adjustable water jet Ø 50 mm

Lateral jet that can be adjusted to alter the direction of the water. This allows the massage to be adapted to the needs and preferences of each user.

Back rotating water jet ø 32 mm

The back jet has a rotating function performs a gentle massage, especially designed for the back area.

Foot jet ø 32 mm

The foot jet consists of a microjet designed with minimum dimensions to ensure a gentle massage on the soles of the feet.

Air jet ø 27 mm

The air jets have undergone a redesign. Featuring a more oval and flatter shape, this new design enhances comfort and improves overall cleaning efficiency.

Soft jet

The soft jets combine the effect of air and water to create champagne-like bubbles from the base of the bath.

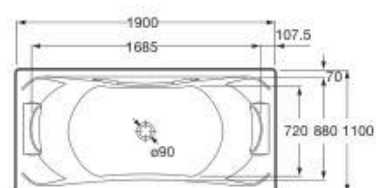

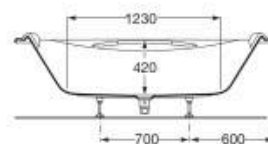

BeCool

Rectangular acrylic bath with Total hydromassage, control panel and waste kit with hidden overflow. Includes headrest and grip.

Surfex®

The warm, matt surface of this innovative mineral-based compound is perfect for creating exclusive baths with a sophisticated touch.

Durable material. Composed of a combination of solids, resins, catalysts and promoters, this material delivers exceptional durability.

Antibacterial. Exclusive zero porosity material that prevents the absorption of liquids and the proliferation of humidity and bacteria.

Repairable. Compact material that is easily repaired and restored to its original appearance.

Sustainable. Made of organic and 100% recyclable materials.

Anti-slip. Textured surface with superior anti-slip properties for maximum safety in the shower.

Efficient. Thermal insulating material that maintains water temperature leading to greater energy savings.

The plasticity of the blend of resins, minerals and pigments used in this material is key to designing original baths with innovative features.

High quality. Gel Coat outer layer and a resin substrate combined with a fine selection of different mineral charges.

Warm texture. Providing a natural and pleasant tactile experience.

Anti-slip. Textured surface with superior anti-slip properties for maximum safety in the shower.

Resistant. Outer gel coating with high resistance to wear, fading, chemical agents and ultraviolet light.

Easy cleaning. The textured surface is easy to maintain and can be cleaned with soap and water.

Repairable. Highly malleable sanitary gel coating that makes it easy to repair.

Antibacterial. Outer layer that complies with the most demanding standards, which certify that viruses do not spread on the surface.

Specific Uses

Roca solutions are designed to meet the diverse needs of modern residential, commercial, hospitality, healthcare, education, and public environments. Engineered to perform under intensive daily use, each product combines innovative technology, premium materials, and thoughtful design to deliver exceptional safety, hygiene, durability, and user comfort. Whether creating accessible washrooms, high-performance public facilities, or luxurious private spaces, Roca offers solutions that enhance functionality while maintaining timeless aesthetics.

Designing products with all users in mind is an integral part of Roca's mission

Water Label

Many of our products are registered with the European Unified Water Label scheme, widely used across Europe to classify and promote water-efficient products. For WCs, the Unified Water Label assesses water efficiency based on the average flush volume. For dual flush systems, the average is calculated from one full flush and three reduced flushes. The rating system ranges from an average flush volume of 3.50 litres or less (Band 1), to a flush volume of more than 6 litres (Band 5).

Key Benefits

Accessibility

Security. Anti-slip and electrically insulating materials, combined with robust installation systems, guarantee secure attachment and maximum safety.

Certified quality. Products are subjected to rigorous approval processes to meet the highest safety and resistance standards.

Durability. Maximum resistance to corrosion, cleaning products, and wear and tear.

Communities

Water conservation. Extensive catalogue of electronic and self-closing faucets to adapt to different styles and needs.

Cut to size. Surfex® basins that adapt to all kinds of dimensions and design requirements.

Resistance. High-quality materials that guarantee the durability and perfect condition of the products over time.

Iconography

●	1 drilled taphole	Basin with 1 drilled taphole
	x / x litres. Dual flush mechanism	WCs equipped with a water-saving mechanism, with two available flush options: 6/3, 4.5/3 or 4/2 litres
	Soft-closing seat and cover	System that softens the descent of the seat and cover, preventing unnecessary discomfort and jolts
	Roca Rimless®	System designed to optimize cleaning and hygiene, exceeding EU hygiene standards
	Multiclean® Compatible	WCs compatible with Multiclean®
	Reduced Mobility	Product adapted to users with reduced mobility

	Softurn	Smooth and controlled operation thanks to Roca's ceramic cartridges
	Evershine	A high-quality chrome outer layer guarantees permanent shine and makes cleaning easier
	Flow rate	Flow rate of faucets in litres
	Touchless	Touchless operation
	Electrical connection	Electrical connection required for correct operation
	Self Closing	Self-closing faucet

Kitchen Faucets

Roca's line of kitchen faucets comes in a variety of styles, shapes and colours that enhance the design of the kitchen while also providing better performance through energy-saving features. Ergonomic designs and versatile functions combined with electrolytic coatings for perfected matt or glossy surfaces reflect Roca's high standards and attention to detail. Innovative features include the Cold Start system and the use of ceramic cartridges. Subtle yet essential features including soft movement, steady flow aerators and low noise applications provide pleasant everyday experiences and long-term satisfaction.

Subtle yet essential features provide pleasant everyday experiences and long-term satisfaction

Key Benefits

Wide range. Variety of styles and configurations for all kitchen needs and styles.

Pull-out spout. Pull-out sprayer with two functions: laminar splash-free function and spray function.

Shower function. Models with shower function for a more effective and efficient rinse.

Cold start. Cold opening that guarantees energy savings up to 35%*.

Durability. All models feature Roca's exclusive ceramic cartridge, which allows a soft and precise operation, with the guarantee of one million opening and closing movements.

*Based on annual savings for a family of 4, considering 2 minutes per day of toothbrushing and handwashing 5 times a day.

Finishes

Evershine. Electrolytic coating guarantees permanent shine over time and makes cleaning easier.

Everlux. Physical vapor deposition (PVD) process, ensuring a perfectly even finish.

Matt finishes. Polyester thermosetting powder coating based on polyester resins.
